So far, have you ever wondered why you have not found out how your mind operates?

Knowing how your mind operates differentiates star performers from the average. Knowing how to configure mind takes your performance to incredibly high level.

What Do We Mean By Configuring Mind?

From the moment we are born, our mind gets influenced by every single sensory experience and the meaning that we make of it. It learns ideas, behaviors, beliefs, values, self-concept, information and skills. It also makes many decisions. All these result into a noticeable pattern of behaviors, which we call personality. In other words our mind gets configured and reconfigured. Most of the time it is happening unintentionally and subconsciously and we are not aware it is happening. Parental guidance and education are conscious efforts to configure/reconfigure mind in a desirable way.

Thus, for all of us, there is already a configuration of mind, which is the existing basis of our self-concept and our behavior traits. If we want ours and others' behaviors to change and improve, we must reconfigure minds in a different way. In that sense configure mind, means reconfigure mind.

So Tell Us, Can We Configure Mind?

The answer is YES. That is what the Seminar is all about. People in the industry, as also every individual today needs to know how to Configure Mind and benefit from it, but they are largely unaware of existence of such techniques.

Do you know people
are at once,
beneficiaries and
victims of their current
configuration of mind?

Empower people with
tools to configure their
minds and unlock their
true potential.

That Sounds Interesting. Please Tell Us More...

In a very challenging situation, for example, some people respond with fear and/or stress while others display courage and calmness.

Now imagine, if we change the mind configuration of the person who responds with fear and stress, and from next time onwards, s/he responds with relative courage and calmness, will this person be more useful and productive in your office? And if the stress does not arise in the first place, there is no need to manage it!

And by configuring mind you can do much more. You can improve communication skills. You can motivate them. You can help them enjoy their work and see their mind getting joyfully engaged. You can align team thinking. And you can also create a whole new work culture.

If You Can Do So Much, There Must Be More...

Yes there is. You can stimulate creativity. You can enhance their learning abilities and you can sow the seeds of more useful and desirable behaviors. Will that be a great value addition?

Information Is NOT Skill...

I know, you already know this. However, kindly allow me to explain it for sake of clarity.

A young boy is looking, longingly at a little older boy riding his new bicycle and having a lot of fun. It is clear that he has the information that the bicycle and the skill of riding it exist, but he also clearly knows he does not have it. Soon, with some assistance, he manages to mount a bicycle and possibly after a few falls, learns to ride it himself. Now he has the skill. It has become his second nature. Now the learning is in his tissues and muscles and nerves. Now he can do it without consciously thinking about it.

Just providing information about diverse skills such as communication, technology, decision making, management and leadership, is not teaching those skills. The learning needs to go deep into tissues, and muscles and nerves before it becomes a skill. It should become your second nature.

So How Does Configuring Mind Help Us?

To configure mind, you learn to use time tested NLP & Huna techniques. These techniques work on neural level. Learning skills this way makes it a lot easier.

Repeating behavior patterns are programs. If we change the program, the behavior changes.

The world is what you think it is.

-Huna principle no 1

There are no limits.

-Huna principle no 2

All Power comes from within.

-Huna principle no 6

So Tell Us What Is NLP.

NLP or Neuro Linguistic Programming is science of creating excellence. It is a methodology developed by Richard Bandler and John Grinder in 1970's. It was further developed by many eminent scholars and thinkers. Over the years, NLP has proven its usefulness and gained popularity. Corporate world noted this and introduced NLP into their training programs.

Neuro refers to nerves in our body. Linguistic is the language we use. When we use language, it actually programs our mind and body at neural level. These programs then run automatically and influence our behaviors, beliefs, decisions, values and self-concept. And all these in turn decide our performance, success, happiness, health, relationships and financial wellbeing.

And What Is Huna?

While NLP is around for just 35 years, Huna is very old. Huna means "secret" in Hawaiian language. It is a system of many techniques and insights, that has been a closely held secret known only to a select few people known as "Kahuna". One of the reasons Huna was kept secret by Hawaiians is the enormous power that these techniques and insights hold. Now, it is slowly getting revealed.

While Huna techniques are generally easy to do, they are very subtle to understand its true power and potential.

At NLP & Huna Group we have discovered ways to use both systems in a complimentary and effective way.

NOW, is your
opportunity to do
yourself a special
favour.

NOW is the moment of
power.

-Huna principle no 4

7 Special benefits of attending-

1. Get introduced to new technology of configuring mind.
2. Get a insight into the way your own mind operates.
3. Discover value from your own perspective.
4. Listen to experts in the field of mind sciences.
5. Network with people who have used it and benefitted.
6. Directly experience for yourself the effects of the techniques.
7. Receive a huge amount of subject information digitally such as–
 - a List of prominent practitioners in Pune & India
 - b Prominent contributors to NLP and Huna,
 - c Compilation of NLP articles– NLP Gold Mine
 - d Many video and audio recordings
 - e Links to important websites and videos and much more...
