

Continued

Thoughts automatically running in your mind decide the results you get.

A student who feels good about himself/herself produces great results.

Being A Student Is Tough...

Sure it is tough to be a student. You get tormented by parents, teachers, examinations, admissions, practicals, tuitions, submissions and orals.

As if this is not enough, you also get advised, commented upon, hurt, insulted, punished, threatened, downgraded, compared, examined, failed and sometimes even beaten.

They put you in a classroom of 50 to 200 students and you are supposed to learn and do very well! You are supposed to get good marks and make your parents and school proud and happy!

What they do not understand is I want to do well too. I want to make good grades, even stand first in class, become a topper and outshine all others.

But however hard I try, for some reason, I can't. And I don't even know why I can't. Even my parents and teachers do not know why I can't. They blame me, get angry at me. I say, please give me a break. Somebody please tell me "how", not "what".

They only tell me WHAT I should be doing. They never tell me HOW I will be able to do it when I can't.

They take away all the fun of being a student. They really do not know what is going on in my mind.

All This Happens Because...

Parents, teachers nor students know how their mind works and operates. They do not know how to "Configure student's Mind" for learning and success.

You have known desktop, laptop and mainframe computers: But have you noticed **“Necktop Computer”**?

Our brain and mind, together work like a computer that sits on our shoulders.

“Necktop” programs need to be changed for better results in life.

What Do We Mean By Configuring Mind?

From the moment we are born, our mind gets influenced by every single sensory experience and the meaning that we make of it. It learns ideas, behaviors, beliefs, values, self-concept, information and skills. It also makes many decisions. All these result into a noticeable pattern of behaviors, which we call personality. In other words our mind gets configured and reconfigured. Most of the time it is happening unintentionally and subconsciously and we are not aware it is happening. Parental guidance and education are conscious efforts to configure/reconfigure mind in a desirable way.

Thus, for all of us, there is already a configuration of mind, which is the existing basis of our self-concept and our behavior traits. If we want ours and others’ behaviors to change and improve, we must reconfigure minds in a different way. In that sense configure mind, means reconfigure mind.

So Tell Us, Can We Configure Mind?

The answer is YES. That is what the Seminar is all about. Every student, as also every individual today needs to know how to Configure Mind and benefit from it, but they are largely unaware of existence of such techniques.

It's the simple things in life that are most extraordinary; only the wise are able to understand them.

-Paulo Coelho in
"The Alchemist"

When you really want something, the entire universe conspires to give it to you.

-Paulo Coelho in
"The Alchemist"

How "Configuring Mind" Is Useful....

A student needs to...

- Focus/ concentrate
- Be curious
- Pay attention
- Improve memory
- Understand
- Be confident
- Be diligent
- Remain motivated
- Be disciplined
- Be humble and polite
- Be grateful
- Be creative
- Be prompt
- Be peaceful and calm
- Have courage
- Set goals

Once You Know How To Configure Mind...

You can begin to acquire all the above qualities. You will also be able to find solutions to many extraneous problems and avoid their negative effects. Your grades improve. Your student life starts becoming more successful and enjoyable. All it takes is having a few insights into your own mind's functions and learning some simple and yet very effective techniques to "Configure Mind".

Repeating behavior patterns are programs. Change the program and the behavior changes.

The world is what you think it is.

-Huna principle no 1

There are no limits.

-Huna principle no 2

Energy flows where attention goes.

-Huna principle no 3

So Tell Us What Is NLP.

NLP or Neuro Linguistic Programming is science of creating excellence. It is a methodology developed by Richard Bandler and John Grinder in 1970's. It was further developed by many eminent scholars and thinkers. Over the years, NLP has proven its usefulness and gained popularity. Corporate world noted this and introduced NLP into their training programs.

Neuro refers to nerves in our body. Linguistic is the language we use. When we use language, it actually programs our mind and body at neural level. These programs then run automatically and influence our behaviors, beliefs, decisions, values and self-concept. And all these in turn decide our performance, success, happiness, health, relationships and financial wellbeing.

And What Is Huna?

While NLP is around for just 35 years, Huna is very old. Huna means "secret" in Hawaiian language. It is a system of many techniques and insights, that has been a closely held secret known only to a select few people known as "Kahuna". One of the reasons Huna was kept secret by Hawaiians is the enormous power that these techniques and insights hold. Now, it is slowly getting revealed.

While Huna techniques are generally easy to do, they are very subtle to understand its true power and potential.

At NLP & Huna Group we have discovered ways to use both systems in a complimentary and effective way.

NOW, is your
opportunity to do
yourself a special
favour.

If someone can do it,
you can learn to do it
too.

-NLP Presupposition

NOW is the moment of
power.

-Huna principle no 4

7 Special benefits of attending-

1. Get introduced to new technology of configuring mind.
2. Get a insight into the way your own mind operates.
3. Discover value from your own perspective.
4. Listen to experts in the field of mind sciences.
5. Network with people who have used it and benefitted.
6. Directly experience for yourself the effects of the techniques.
7. Receive a huge amount of subject information digitally such as—
 - a List of prominent practitioners in Pune & India
 - b Prominent contributors to NLP and Huna,
 - c Compilation of NLP articles— NLP Gold Mine
 - d Many video and audio recordings
 - e Links to important websites and videos and much more...
